VESPERTILIO LEISLERI.

Since the account of the *Vespertilio Leisleri* appeared in the 'Annals of Natural History,' the bat has been examined by the Rev. L. Jenyns, who is of opinion that it is not a specimen of *V. Leisleri*, but is at present undecided whether it is the young of the Noctule or a distinct species.—THOMAS PAINE, Jun., *Great Yarmouth*.

We have to state, that with regard to our note at page 349 in Mr. Babington's Paper 'On the Botany of the Channel Islands,' that it was founded on a misapprehension originating from a misprint. On referring to Mr. Babington's manuscript, we find that the word "confirmed", rather hastily and indistinctly written, was mistaken by the compositor for "conferred"; and that Dr. Boott had merely pronounced it to be *Carex punctata*, Gaud., and not that he gave a name to it already applied to another species, an oversight very unlikely to have been made by one so thoroughly acquainted with the genus, and whose monograph is anxiously looked for.—EDIT.
